At first I thought I found my way to something new
But all they said would happen never came true
And when you found me I was there beneath gray skys
And everywhere can you hear me so

I thought of what to say relized that I was wrong I hurt
my self today

Get away (get away)
Far away (far away)
Get away from all those days

I stop for just one second
Nostolgia can be more hurtful to me

So I thought of what to say dreams just don't go away I
hope you'll know someday
Get away (get away)
Far away (far away)
Get away from all those days ohh

And im so tired
That I can never promise with my way
For all those times you sang to me
Songs of hope and miseries go on and on

Get away (get away)
Far away (far away)
Get away from all those days

Get away (get away)
Far away (far away)
Free from the world from all the price you paid yeah
