One hundred seventy nine nations united in a policy  
Based upon the profits of exploiting the majority  
The means of production controlled by the rich  
The trade industry subjugated as their wish

The International Monetary Fund was formed shortly  
before the end  
Of the first world war as a plan for world development  
in the post-war era.  
It has been the primary source of funding  
"development projects"  
In the unindustrialized nations of the third world.  
The main institution of the IMF is the World Bank  
Which then forces exploitative economic standards as  
a condition for membership.

World bank projects dealers in death  
Re-adjust the third world to suit the wealthiest  
World bank programs to indoctrinate the masses  
One bank, one profit, shove it up your arses

The North American Free Trade Agreement creates a  
"free trade zone"  
Within Mexico, the United States and Canada.  
Corporations use this to force down wages in the US  
and Canada  
By threatening to and in many cases actually moving  
production to Mexico  
Where they abuse minimal environmental standards  
and fair labor laws

Free trade policy loosened restrictions  
Loosing the belt of the rich's convictions  
Free trade on livelihoods free reign on the environment  
Destitution for the poor everything for the rich

The General Agreement on Tariffs and Trade  
Is a treaty which expands the principals of NAFTA to a  
worldwide economy.  
In addition to creating a world free trade zone  
GATT creates a World Trade Organization which must  
approve all possible restrictions on trade.

Therefore, all major decision concerning  
environmental and labor issues  
Are made by a limited corporate body

If these are all "agreements," who agreed!
