As we begin the end
Let us close the womb this time
My friend

We live together, forever
Every breath that you will take
I'll breathe
Perfect vision
What's your pleasure

And we're here again
Where I live
In a perfect hell
And you're here again
I can hardly see
I will live again
Until it hurts to be me

What's your pleasure
My name
My face
My spirit
Now leave me
Now go

This is hell this is
End of time
Lost completely
So this is life is this
I can hardly face to live
When it hurts to be me

In my world
My world
I will wait for you
Take control of you
You're lost, so lost
