Come, come and taste the blade cold and steel
With that grin upon your face bring it all down here
All down here, let's make it real

Love on the streets, emotions for sale
Just take whatever comes on your way
I swear you won't regret
Get in, release your lust and needs
Just for one night down on your knees
Play dead, enjoy and forget

Girl forget the world outside that is made of rules
Be my queen of desire, live for your sin
Let me be your sin take me under your skin

Love on the streets, emotions for sale
Just take whatever comes on your way
I swear you won't regret
Get in, release your lust and needs
Just for one night down on your knees
Play dead, enjoy and forget

Love on the streets, emotions for sale
Just take whatever comes on your way
I swear you won't regret
Get in, release your lust and needs
Just for one night down on your knees
Play dead, enjoy and forget

My queen of desire come light my fire and scream!
