"For Every Heart"

Visit "[For Every Heart](#)" on MotoLyrics.com

Love and no fear
It can't be cured by herbs
If you love til it hurts
There's no more hurt, but love
There's love, always love
May be shy - May be loud
Let me know if you're near
Find me, please!

What is love you've never been told
What is love - My problem to solve
Searching for love won't you stop
For every love there is a heart
Love is light whenever you go
Lo-lo-love is just all we want
Searching for love won't you stop
For every love there is a heart

Eager to be over heels
A game where two can win
Be my prize, be mi private V
Won't you play this game with me?
Want to open with no key
Want no more fake spring of force

Find me, please!

What is love you've never been told
What is love - My problem to solve
Searching for love won't you stop
For every love there is a heart
Love is light whenever you go
Lo-lo-love is just all we want
Searching for love won't you stop
For every love there is a heart

Won't you play this game with me?
Want to open with no key
Want no more fake spring of force

Find me, please!

What is love you've never been told
What is love - My problem to solve
Searching for love won't you stop
For every love there is a heart
Love is light whenever you go
Lo-lo-love is just all we want
Searching for love won't you stop
For every love there is a heart

Love is light whenever you go
Lo-lo-love is just all we want
Searching for love won't you stop
For every love there is a heart
