Suzi left his .. so cold  
Everybody change it I am just trying to keep it off  
I am always feeling down just need to let it go  
I have been dawning in this bottle .. myself  
If I am everything that matter I am gonna move through  
the weather  
Started game cause it's been so cold  
My nigger is twisted my head is spinning loosing vision  
Something got me tripping my whole ego need a griffin  
All my chances all existed don't give a fuck ..  
Something ego in the engine .. I guess my ehart we are  
missing  
Drop top  
I am looking in the mirror .. so cold  
I am looking in the mirror .. so cold  
I am looking in the mirror .. so cold  
I am looking in the mirror .. so cold  
I have been feeling so cold .. like my B6  
Travel the world out .. another level when you are  
dancing with the devil  
About my chest no second guess .. try to .. till I am  
missing  
People back that cold .. don't blow up  
Giving it back .. fuck with no love  
I am looking in the mirror .. so cold  
I am looking in the mirror .. so cold  
I am looking in the mirror .. so cold  
I am looking in the mirror .. so cold
