"Think About The Children"

Visit "[Think About The Children](#)" on MotoLyrics.com

All the children in the streets, got no place to go. all the people they can't meet. all the things they need to know. they die from diseases, from heart surgery. just think about how much it hurts. when they've got no doctors good enough. these kids can't live like this anymore. all the dying kids, to the diseases. we don't need anymore...

When you are just sittin at your window, think about the kids, and all the things they need to know. think about how much it would help them just, think about the children.

All the children with no homes, got no place to go. just thinkin, "why can't I ever get better?" but it would help, if we work together. to help these children with their needs. and to help them succeed.

When you are sittin at you window, think about the kids, and all the things they need to know. think about how much it would mean to them just, think about the children.

Try to help the children...
