Collapsing now

Empire of the scumbag  
Reject all the lies you forced them  
An hook up the nose to take down the brain  
This shit went on just too long, far too long  
You took the life off their lives switched off their  
heads with all your lies  
An empire built on million to assholes

Like salt on a deep down wound I despise you

Tore it down it won't get up again  
An Empire built on fractured minds collapsing now

I am here to create the end  
Wake up this mass of switched off brains  
Inject their skull with supreme pain  
It's like a sick mass brainwashing machine  
Now you'll just taste how it feels to fail

Like salt on a deep down wound I despise you

Tore it down it won't get up again  
An Empire built on fractured minds collapsing now

Tore it down it won't get up again  
An Empire built on fractured minds collapsing now
