Take all strength  
Purify my faith

Take all strength  
Try to do the best  
Kill your stress  
Let it be a fairytale  
Realize your success  
Change a situation  
And nobody will be against

Take all strength  
Purify my faith

Every one whispers to your ear  
But you don't listen to  
Baby, you are not a loser  
Carry on doing your thing

Higher than skyscrapers rise  
Follow your American dream  
Through the air to the universe  
See the ups and falls

You gotta recognize  
What you're setting up  
It's already more than Grammy  
Let it be last time

Show that you deserve  
No better deal than yours  
You are already obsessed over success  
Send new challenge to your fate

Maybe you will fail  
But try once again  
It's not a dead end  
Let em say

You killed our stereotypes  
Your business picks up

Break all barriers  
We must develop next line

Even when your patience became grains  
And you feel like candle in the wind  
Close eyelids, get your freedom  
Only puppets weep crocodile tears

Hook

All doors in front of you have to be opened  
Fulfill your dearest wish  
Offended but will never give up  
I'm alone against war inside

Show your opinion  
If everyone forgot my idea  
Name me stubborn  
Actually my desire will be granted

Listen how my heart stops  
I will never give up trying  
Water our road with blood  
I'll get another prize

Caz we lost so much  
I'm a last soldier  
And my army needs a revanche  
We gonna give place to none

That's why don't know limitation size  
As we are young  
I stick to my colors  
And never look behind

We were blessed by supreme force  
But luck is a flashing light  
Find new way to survive  
Our aim is naïve and blind

Hook

I wanna express my emotions  
It's a moment to grind  
I can give happiness  
And u relieve my cry

Nothing inspires me  
See how I'm divided in half  
Feel my sixth sense  
The dream is still alive

That's not a hyperbole  
Just real life  
I'm a small stone in a big globe  
But was chosen to fight

All within your vigor  
Touch the height  
When you're at the bottom  
Prove that you're smarter

Never ask doom  
Do I deserve it?  
Hell, yeah, go ahead  
My tape is not a mistake

Am I getting off?  
I do it exactly  
Without any question  
Stop checking my frame

I take care of bygones  
And don't explain away  
Notice my offence actions  
I won't it negate

Stand to your guns  
Nobody is perfect

Hook
