No one wants to hear about your lying misdirection
FUCK NO!
We don't need no more,
Racial hate social infection
You gotta us there with our eyes bugging out
Shut our mouths we got no right to shout
Then you tell us that were happy this way
You got us believing every word you say
You got us believing
U.S.D.A.

Put a tag on every single person born
Listen to you man our lives will sure be scorned
Follow you like good little soldiers should
Do that man your life will sure be screwed
Well we don't really have to be around here
We don't have to bother we don't have to fear
We got each other and we got our own mind frame
It was never us it was you to blame

You got us believing every word you say

You gotta fight stand up for what is right
Do you really want another dead kid tonight?
Say it's something that you just gotta do
Wasn't me, was you playing the fool

You got us believing every word you say

No one wants to hear about your lying misdirection
We don't need no more
Racial hate social infection
You gotta us there with our eyes bugging out
Shut the fuck up we got no right to shout
Then you tell us that we're happy this way
