The beats make me high and feel extra clean  
The sub runs through my veins just like morphine  
Keeping me drowsy like I'm in a dream  
So that when I look around nothing is like it seems  
I'm looking through thick misty lenses  
But my view is clear  
Who ever thought that it could make my problems  
disappear  
When pressed pause my heart's pierced with spears  
The thought of losing it makes me shed a million tears

Some chop it dis it cut it rip it  
Fuck around with it  
I hug it miss it want it kiss it  
I'm in love with it  
I said I'm in love with it  
And I'll do anything  
To get just one more whiff of it

It's made me hit rock bottom  
It's made me touch the sky  
Sometimes it lets my pen fall  
And makes my pages cry  
It keeps a close eye on me  
Like an undercover spy  
But it would never trick me  
Nor ever lie  
My ultimate dream is to be  
Able to make my words fly  
But there's a big price to pay  
For them to rise high  
I'll be addicted to it even the day I die  
We'll stay together  
Just music and I

Some chop it dis it cut it rip it  
Fuck around with it  
I hug it miss it want it kiss it  
I'm in love with it  
I said I'm in love with it  
And I'll do anything  
To get just one more whiff of it

It's the single ray of light  
That shines upon me everyday  
The gloomy sky above me then  
Sometimes stays away  
It tries to keep me on track  
But still my mind goes astray  
Dusty memories disappear  
And thoughts turn to clay  
I've got to stay sharp  
No time for delay  
One wrong move  
And my dreams shall fray  
I would be lost without it  
My heart cold as ice  
And with my last breath I say  
You're the love of my life

Some chop it dis it cut it rip it  
Fuck around with it  
I hug it miss it want it kiss it  
I'm in love with it  
I said I'm in love with it  
And I'll do anything  
To get just one more whiff of it
