You're something more than sunny  
And you're electrifying me  
I'm gonna love your money  
You got a style that sets me  
Is this the new temerity?  
I'm gonna mend you many

I didn't know it could be nothing (Right!)  
How could I could know it'd come to nothing? (Right!)  
But what you say and what you give are to very  
different things, boy

I didn't know it could be nothing (Right!)  
How could I could know it'd come to nothing? (Sight!)  
But what you say and what you give is no kind of way to  
live

My buddy used to be someone who was striving  
endlessly  
Somebody who loved me and could never go wasting  
One who says that it's true or dies

But my buddy has it made  
Everybody wants to be his slave  
Got so many hearts they ought to start a parade  
Singing nobody could ever replace... replace my buddy

I don't mean to be frightened  
But you know we have history  
This is my life I'm betting

Your floral face is fading  
Are you beside or far away?  
You say I get you, baby  
What did you say?

My buddy used to be someone who was striving  
endlessly  
Somebody who loved me and could never go wasting  
One who says that it's true or dies

But my buddy has it made  
Everybody wants to be his slave  
Got so many hearts they ought to start a parade  
Singing nobody could ever replace... replace my buddy

You go  
You come  
You come  
You go

There's no escape  
There's no control  
I look for warning signs  
But warning signs are on the [?]

Another dream that bites that dust  
Another bee I cannot trust  
I should protest  
Just give in  
But I wanna be free-ee-ee

I didn't know it could be nothing (Right!)  
How could I could know it'd come to nothing? (Right!)  
But what you say and what you give are to very  
different things, boy

I didn't know it could be nothing (Right!)  
How could I could know it'd come to nothing? (Sight!)  
But what you say and what you give is no kind of way to  
live

My buddy used to be someone who was striving  
endlessly  
Somebody who loved me and could never go wasting  
One who says that it's true or dies

But my buddy has it made  
Everybody wants to be his slave  
Got so many hearts they ought to start a parade  
Singing nobody could ever replace... replace my buddy

Buddy  
My buddy, my buddy, my buddy  
Your buddy  
Misses you
