Ooooh, Ooooh

How many nights did you wait for the phone to ring?
Wondering where he's been or the next excuse he'll
swing
How many hearts will he break while the second
chances flow?
You can deny what you want, but I think there's
something you should know

(Chorus)

I would kill to catch your eye, standing at your side
I wanna hold you tight and never let you go
Be there to make you see that love will set you free
Girl, take it from me, this is how it's gonna go
Each minute by minute for the rest of your life
I'll make up for all the wasted time
So when you're done with being his Plan B, call me!

How many tears did you waste you now wish didn't fall?
And how many friends did you lose because he
screwed them all?
What do you see in a man who can only please
himself?
Does it turn you on to be last in line of girls he puts
through hell?

As if you can't tell,

I would kill to catch your eye, standing at your side
I wanna hold you tight and never let you go
Be there to make you see that love will set you free
Girl, take it from me, just in case you didn't know
With every kiss, I'll be proving myself
Making you feel like you always should have felt
So when you think you're worth the love you need, call
me!

Baby

Girl, I'm just waiting for the day you call me

Because what comes around goes around

(...)

Waiting in the wings for his karma to arrive
I will be here holding on because all he's done is do
you wrong
Praying for the day that you see the light and let me
treat you right!

(Instrumental Interlude)

Oohoh Ooooh

I tell you year by year, every second in between
I'll be the twice the man he's never been
Get over being his Plan B and call me!

Call me (call me)
Baby

When you wanna get the love you need, call me

Baby (Baby)
Call me...

Woahh... call me
