I've gotta get my courage up
Tonight I'm gonna tell you how I feel
So long I've been holding back
what's inside of me

I've wrestled with my confidence
now I want to learn to live again
You've gotta take a chance on love every now and then

After so many heartbreaks baby
I'll leave them all behind
Cause I know, you're all I need tonight
You're all it takes to get me high
You're all I need tonight
Won't let you pass me by

I used to lock my heart away
but you gave your love until it set me free
I never thought that a girl like you
would believe in me

Ooooh there's magic everytime we touch
you always make me feel like I belong
Together we could build a love
that goes on and on and on and on

You're one in a million baby
You made me see the light
Now I know you're all I need tonight
You're all it takes to get me high
You're all I need tonight

My everything my one desire
and I know cause you're all I need tonight
We'll take on the world
Just you and I
You're all I need tonight
It's never felt so right

Do you wanna
Do you wanna

Do you wanna hold me now
Come on and wrap your arms around me
I want to feel your heat surround me

Now I know
that you're all I need tonight
You're all it takes to get me high
You're all I need tonight
You're everything my one desire

We'll take on the world
Just you and I
Cause I know, you're all I need tonight
It's never felt so right

And I know that
you're all I need tonight

You're all I need tonight
