You said you love me  
But you wont come down  
So I'm leaving tomorrow

I'm a traveler making my way around the world  
Airplanes and automobiles carry me away  
I got my whole life ahead of me, but  
I want to make you my priority  
I got my eyes on you  
I could be ready to settle down real soon

Oh love!  
I see you up in the air, Love!  
I know how much you care, Love!  
But if you stay up there for too long  
I know I will be gone

You said you love me  
But you wont come down  
So I'm leaving tomorrow  
And when the long road is calling me  
Like a smile that comes with a summer breeze  
I know somewhere down here  
There's a place for you and me

Oh love!  
I see you next to the moon, Love!  
I know how much you care, Love!  
But if you stay up there for too long  
I know I will be gone

But if you Say Yes! to following your heart  
Yes! To keeping me on  
Your mind and in your arms tonight  
Where I can celebrate  
The day that you will ask for me to stay
