i went by your house last night/your mother said that  
you left/  
had a fight, and didnt know where you went/  
i thought i knew/ followed your footprints in the snow  
to the corner where you go/ those boys down there  
wont do you any good/  
youre getting to the point/ you gotta make a choice/  
stay here and die/ or runaway with me/  
dont be fooled by false security/ so swaddled up in  
your routine/  
that you forget these streets have claws and teeth/  
little marie/the way youre living your lifes  
killing me/i tried to make you see  
dont look at me that way/ i see it in your face/  
you gotta leave this place/ little marie/

cheap booze and broken dialogue/  
is that your answer/or your cause/  
a tragic case of 'just forget it'/  
just shoot it up/if you can get it

chorus  
dont look at me that way/look at me/  
dont look at me that way
