"Summer Low"

Visit "[Summer Low](#)" on MotoLyrics.com

living in my bed too long
i should get up but i?m not that strong
the sun won't find it?s way into my window

i didn?t see you slip away
i should be up and on my way
i need words, cause i?ve got things to tell you

all i get is summer low
just another day and the blues stay too
all i get is summer low
just another day and the blues stay too
it stays with you, yeah

there?s a world outside my door
but i don?t want it anymore
something?s changed
it?s not the same without you

i walked along the beach today
summer seemed so far away
rainy days have followed
since you left me
