You gotta live it right cause you won't live it again,
Live your life to full cause nothing starts when it ends
So give it everything and never let go
Cause when your time is up
Is just an answer you just don't know
So give it everything, so give it everything,
So give it everything, and never let it go.

Time and time, another day wasted,
You just complain, and say you'll never make it
You gotta try cause no ones gonna do it for you.
You're wasting your time day by day,
You just don't know.

You gotta live it right cause you won't live it again,
Live your life to the full cause nothing starts when it ends.
So give it everything and never let go,
Cause when your time is up
Is just an answer you don't know.
It's a one way street of uncertainties
And endless possibilities
So come on come on
You know you gotta live it right.
So come on come on
And live the best of your life.

When you're seeing nothing around
And all you hear is the silence in sound
And the lights turn out around you
Know that the answers are right there in front of you.
Life don't wait for no one to take it
You just gotta make it
Everything that you wanted it to be.
