Well I remember that sparkle in your eyes  
That I've seen a thousand times before  
Shining like that stars I used to write your  
Name across the sky

Well I remember you lying next to me  
When we fell asleep last night  
Cuz in the morning you left me a note that said I hope  
your  
Day turns out alright

Lipstick on the mirror that says I love you  
Whenever you are near I'm thinking of you too  
Lipstick on the mirror that says I love you  
Lets get out of here you know I love you too

You know I love you too it's true

Hey girl do you remember when we used to laugh  
At the stupidest of things  
And we were just a couple of kids outta high school  
When I asked you to marry me

And I still remember that look on your face  
Ya I know that left you speechless  
But you found a way to spit it out  
And all you could say was yes

Lipstick on the mirror that says I love you  
Whenever you are near I'm thinking of you too  
Lipstick on the mirror that says I love you  
Lets get out of here you know I love you too

You know I love you too it's true

Lipstick on the mirror that says I love you  
Whenever you are near I'm thinking of you too  
Lipstick on the mirror that says I love you  
Lets get out of here you know I love you too
