I'm a live between an confusion
In my own flesh and blood
All day long I've just seen they moved alone
Mortify and I feel so ashamed

I'm sailing away
And better go to burning hell
Then I've must living with this scene (2X)

How can be? This problem should be end
In my own flesh and blood
Because I cannot take it this anymore
Mortify and I feel so ashamed

I'm sailing away
And better go to burning hell
Then I've must living with this scene (2X)

And I can't ignored
That problem filled up my mind
(I can't ignored that filled up my mind)
And I can't evade
If this scene became a strong headache
