Got to the sun and pass all the stars  
Down to the moon and heading to Mars

Smells like burning  
Now I'm out of orbit  
Watch the turning  
In my head you're saying goodbye...

I can't just stay  
Take a breath and you can see it's so real  
I can't just stay  
Take a breath and you can see it's so real

Up to Cygnus  
It looks smaller than I thought  
See that signal  
The fuel is running out  
Goodnight...

I can't just stay  
Take a breath and you can see it's so real  
I can't just stay  
Take a breath and you can see it's so real

I can't just stay  
Take a breath and you can see it's so real  
I can't just stay  
Take a breath and you can see it's so real

How are you doing today?  
I am calling NA  
What are you up to today?  
I am running away

Take a breath and you can see it's so real
