1-2 fuck off, drop out, never trust a fucking hippie
And for that matter don't trust anyone.
Quit school, don't work, livin' out the music de punk.
If I could do it so could anyone.

Drugs are good, they let you do things that you know
you not should.
And when you do 'em people think that you're cool.
And when you do 'em people think that you're cool.

1-2 join a punk band, shave your head and get a tattoo.
You don't need talent just sing out of tune.
Self destruction, no moral to throw it on me.
For no particular reason beat up everyone.

Drugs are neat, and you can buy 'em relatively cheap.
And when you do 'em people think that you're cool.
And when you do 'em people think that you're cool.
