"Nowhere"

Visit "[Nowhere](#)" on MotoLyrics.com

You can't believe the things you see and read
The Soviet threat
Our pseudo enemy
What's scaring me?
Our foreign policy
To make the world safe for business
Call it democracy

Our human nature, it's all the same
We spend our lives in the pursuit of happiness
So stop the hate, open the iron gate
It's our destiny to make the cold war history

You think I give a shit
If you're a socialist
If you're a capitalist
We've all got to exist
On this planet with nowhere to run
The millions of brainwashed must open their eyes
We are one

With us over here and them over there
Barbed wire borders are going nowhere
