Searching for a light in the dark
So much loss in your life
You're feeling left, you're feeling left behind
And there's a struggle going on inside
Yeah I saw it in your eyes tonight
It's got you thinking like there's nothing you can do
But there's something you can do

You live
Burn all white flags to the ground
And know it in your heart that you can never surrender
Can't just get back up, you've got to look inside
Because you're searching for a light in the dark
Don't just carry on, because there's something more

And you're searching for a light in the dark
I know you're feeling like you can't go on man
Yeah I heard it in your voice tonight
It's got you thinking that there's nothing you can do
But there's something you can do

You live
Burn all white flags to the ground
And know it in your heart that you can never surrender
Can't just get back up, you've got to look inside
Because you're searching for a light in the dark
Don't just carry on, because there's something more

It's got you thinking that there's nothing, nothing you
can do
But there's something you can do
You can light the way
And live, and live, and live
Burn all white flags to the ground
And know it in your heart that you can never surrender
Don't just get back up, it's time to look inside
And you become that light in the dark
But just carry on, I'm asking you to light the way
