Not quite a fembot
But almost an alien
She's in the smell of the month club
I feel it in my lungs

Lesbian junkie funky
Slam dunk a cosmonaut
With laser guns and having fun
Biological parking lot

All systems down

So titty-twist a mad scientist
Oh is this the toxic ride
Wrap me up in a plastic bag
And hang me out to dry

Artificial respiration
I need my medication
Load me up and light a match
All systems down and out

It's down and out
