### "Winter Solstice"

Every day a struggle  
Every night is infinite  
For that who won't listen  
Avoiding celestial light

In the trance of the waiting  
But without anything to think  
I still can't digest  
The series of events  
Senseless, pointless

Sordid sequence  
It left me neuter  
And inexistent  
Black penitence  
It left me... dead

I see your eyes in the mirror  
Millions of eyes speculating  
In the trance of the waiting  
But the usual happens:  
Dramatically and absolutely:  
Nothing

Every day a struggle  
Every night is infinite  
For that who won't listen  
Avoiding celestial light

Eternal winter solstice
