

## Eventide "Through Black Holes"

Visit "[Through Black Holes](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Eyes wide open in here

Sensing there's something wrong with me  
And with the room they've put me into  
I try to fall asleep when there's no really need to  
breathe  
How come I ended up alone?  
Absent, forgotten, slowly withering away

Wither away, wither away I  
Wither away, wither  
Through black holes I stray  
Eyes go blind in here

Wither away, wither away I  
Wither away, wither  
Through black holes I stray

Now I don't want to turn this around, bring me the stars  
When the last of the bright goes dark I am a part  
We are all of the same old matter, it matters no more  
We unite, reconcile
