

Long Story Short

"Winter"

Visit "[Winter](#)" on MotoLyrics.com

We're in the middle of the winter
And walking hand in hand
Long time no see, but now you're here with me
To bless this icy land

If the night is dark and cold
I will warm you with my kiss
Let me hold you in my arms again
And vow to stay with me
Through the snow

I was always sad and cold
All alone, before we met
Now you've taught me how to find the light
Even in darkness of winter

We are wandering hand in hand
Up and over hills of snow
We'll keep on walking through winter
