Softly it fades bleeding for days come inside I'll show
you the way
We follow cross fades that intertwine slowly in pastures
of translucent
Isolation and can you stop just to listen to anything but
your own thoughts of
Existence persistence her eyes from a distance burn
holes forever (chorus)
Cover your eyes in fear don't look or speak just move
forward into your black
Hole rebirth it seeks to destroy you move move
yourself lose lose control
Nothings forever
Tumbling crumbling piece by piece I'm torn down to the
core and what I find
Developed in time is a rhythm that repeats in my mind
over and over again sweet
Insanity lays right beside me and sleeps forever

[Chorus]

The galaxies surround me lifelessly and I'm waiting for
the time when
Walking through open doors silently am I ever gonna
find out where it leads how
It bleeds possibly I'm disintegrated strangled deflated

[Chorus]

Nothings forever no nothings forever except this silent
power
