T-I-M-E to party feeling free
With my hat brim low and my hoodie up
People wall to wall when that bass hits
Yeah, it just fits I move cross the floor

Let the music come and take control
As it hits your soul it fills you up
Universal style what y'all hearing for miles
And we'll let the bass pound
And share that crystal clear now bounce... (bounce...)

It's not even Friday but I'm ready
Come to party all night long
Gonna tell the DJ what to play
Coz I wanna hear my favourite song

Gonna let my hair down
Haters stay down
I do, what I wanna do

You know you want it
Don't even fight it
Coz I know you like it
Just take a bite and
Enjoy the ride with me tonight

Have I seen you around before?
But if not let's start off by saying hello
I really wana dance tonight
Don't waste my time

I wonder... wonder... wonder...
Why the world is going under
When we're sitting here tonight
Forget our differences tonight
I wonder... wonder... wonder...
Will it be... just you and me

Hey, do you understand the beat done changed
As I make them girls jump turn it up
It's a phony world we live in

People faking and taking
What's not theirs from you

Life is full of ups and downs
Discriminations all around
Help us change the nations
And the problems that were facing now

It's not about where you come from
Or how much you make babe
It's all about havin' some fun
I think I just wanna, take a chance
Just take my hand

I wonder... wonder... wonder...
If we can see past the color
Come together tonight
I wonder... wonder... wonder...
After all I'm falling for you

You know my name, but are you feeling me
I'm liking the way you move

I love the way you got me feeling it
Moving to the beat with you

I wanna be like this forever
Trapped in your arms tonight
I hope it's not the end
Coz I don't wanna say good bye

I wonder... wonder... wonder...
Why the world is going under
When we're sitting here tonight
I wonder... wonder... wonder...
Will it be... just you and me

I wonder... wonder... wonder...
If we can see past the color
Come together tonight
I wonder... wonder... wonder...
After all it's too late
I'm already falling for you
