Snakes and birds to kill the hunger for a while  
They gather and plan  
Desiring an unspoiled slit  
A young cunt  
A hunt to hunt a beauty down  
Stalking with their evil eyes  
Lie hidden behind fruited vines

Fields near the village  
A girl so lovely in her sweet girlish shyness  
Glory crowning her wonderful hair  
Dark brown with a natural care

A verdant green darkness to obscure the forest-  
dwellers  
Strangulation and first ejaculations in the garden and  
bone cave

A hand to stop the screaming  
A palm to break the jaw  
Following the foul smell on the breeze  
Making their way through the evergreen trees  
Carrying her unconscious body into the cave  
Should kissing take the whole night

Teach them and feed them  
Let them lick your feet  
Show them the secrets of human food  
In a day or two they will not take you

Howls of lust  
How do you prefer the ending?  
The warmness in your mouth may or may not be  
swallowed  
The gogo favours both styles  
A noble  
Ass to mouth
