\*Chorus\*

(Te Awanui)

Well at times this world be getting hectic  
My people I just wanna disconnect it  
Find something to nourish the pain  
Coz conditions don't consistantly change

\*Verse 1\*

(Feleti)

Engulfed within the shadows of a parallel dimension  
Tears threaten to expose exterior deception  
Render my sorrow pure of merciless conception  
Vengence surges through veins contaminating senses  
Flee the vicinity morphing positional status  
Disengage atmosphere reflect upon the havoc  
Disembody the spirit, rejunvinating the mind  
Portals reopen and teleport me to another time  
(Junior)

Coz this world be spinning around dark clouds above  
my head

I got heat on my shoulders more frustrating then a  
needle and thread

I can forsee a negative outcome if this pressure ain't  
controlled

Confused, abused, profanity

I ain't got time for compromise, aggressive now it's  
happening

Hard times experiencing absent minded negative  
conscious

Right denied, with physical contact, verbal beating  
Mental intelligence check

The special problem analysis

\*Chorus\*

\*Verse 2\*

Twin guardians suspend visual

Convert negatives with syllables

The soundwaves deviate the subliminal regulate

Reality with audio residual

Now I'm gon let it slide, now absorb

(step aside)

Raw expression mediates senses

Verbalise state of mind thought comprehension

(Donald)

I'm lost in vision should I, should I not is the decision  
It's a battle of the mind with informed precision  
Alternative choice to be selected with the process  
Heart rate prompt adrenalin to the conscience

(Te Awanui)

For sure this world be getting hectic  
Sometimes wanna sever reality disconnect it

(Donald)

Which ever way the wind blows, ethics stand the test of  
time

Its a race against reality, result defined as wise

\*Chorus\*

\*Verse 3\*

(Feleti)

Now I've repainted my train of thought  
Shedding the baggage which have been like daggers  
in the heart

The broken bridges burnt through the storms of  
combat

Connection re-established sabre time to counteract.

(Te Awanui)

Analyse alternatives

Now level to compromise

Increase the volume

To ease my mind

(Junior)

Mentally traumatised, psychologically hypnotised  
Unstable but still able to reconnect upon the mental  
As the darkness starts to rise and still the sun is yet to  
set

Don't blame release the pain, just take a breathe and  
maintain

(Donald)

Constant consumption of assumptions my functions set  
on

Assumption leading down the path to self destruction

Cranial overload systems malfunction

A definite choice is all I'm wanting

\*Bridge\*

(Te Awanui)

Now take it back to life

What's going on, what's going on

Back to reality

Back to life

What's going on, What going on

Back to reality

\*Chorus 2x\*
