In Europe the Economic and Monetary Union failed and  
the U.N.  
showed incapacity and stupidity  
the richest heads of government conspire  
to rule the world  
they call one world currency to favour people  
a sadistic economic system defaults all the nations  
corruption, a secretive power elite speculate  
slave politicians support the clan for a fucking slide  
democracy with thousand laws  
authority made of greed  
hidden heads, guileful attack, a reign of terror  
and they laugh on our back  
9/11, norwegian hardliner, 'cause they rule  
a financial state and they are growing fat  
regime of unrelenting pressure intimidates  
poorest countries get poorer, the other richest ones too  
NWO  
NWO  
NWO  
NWO  
ridiculous conspiracy theory?  
but look at those bitches and tell me  
how can i believe i'm blinded fool  
they're stepping my dignity
