Mmmm mmm
How you like it now
How you like it now, baby
You need me
You need me too, yeah

I can't hide from things that you do to me
Even though you deny every girl with me
You say we're friends when
I say that we're much more
And how could I let go of
What I've been looking for
I can't let you take control of me
(Oh no)
I've gotta get you
(no, no)
To give me what I need

I need sexual attention
Baby I should mention
Is something that I need from you
I wanna love and I need you to need me too
Oh, sexual attention baby I should mention
Is something that I need from you
(something that I need from love)
I wanna love and I need you to need me too
(Oh)

I can't see what you wanna get from me
I give you good love and more
(yeah, everything)
Can you give me one reason
Why we should be apart
If I mean anything to you
Tell it to my heart
(oh, yeah)
I can't let you take control of me
(oh, no)
I've gotta get you
(no, no)
To give me what I need

I need sexual attention
Baby I should mention
Is something that I need from you
I wanna love and I need you to need me too
(I need, I need, I need)
Oh, sexual attention baby I should mention
(sexual attention)
Is something that I need from you
(something that I need)
I wanna love and I need you to love me too
(I wanna love, I need to love, hey)

What I want from you is
(sexual I need from you, yeah)
What I need for love right now
(me to you, me to you, me to you to me, yeah, me,
yeah)
Sexual attention baby I should mention
Is something that I need from you
I wanna love and I need you to need me too
(said I need from you)

Oh, sexual attention baby I should mention
Is something that I need from you
I wana love and I need you to need me too
(girl you know I need you to need me)
Sexual attention baby I should mention
(sexual attention)
Is something that I need from you
(girl you know I need from love)
I wanna love and I need you to need me too
(girl I need love from you)
Oh, sexual attention baby I should mention
Is something that I need from you
I wanna love and I need you to need me too

Lead vocals by T.J. Jackson and Taryll Jackson
Background vocals by 3T
