

Break The Sun "Dangerous Sign"

Visit "[Dangerous Sign](#)" on MotoLyrics.com

Still a long time!

Oh my god!
What do you give to the world
On the other side, you give us a sign
Right now!

Sun which would be catastrophic
That will hit the earth and the clouds turned black
Red sea becomes filled with blood
Humans can burn less fossil fuels
Sun which would be catastrophic
That will hit the earth and the clouds turned black
Red sea becomes filled with blood

Oh!
Give it the right way for us and will survive
Toward heaven is large and last destination
Would definitely go back to god in heaven

There will come back!
There will come back!
There will come back!
There will come back to god in heaven

Let us just face the weather
Even it's too hard to breath and struggle from those
clouds
Left scars through our lungs
Brings never ending insanity in every inch of a human
hair
Can't blame the sun
Can't blame the sun

Destruction of the earth is very severe and can not be
tackled
Behind the sadness in the world and they all will not
return to the world
Destruction of the earth is very severe and can not be
tackled
Behind the sadness in the world and they all will not
return to the world

Do it or you die?
Oh!
Crucified people
Oh!
Do it or you die?
Crucified people

Should we give up and keep mouth shut and find some
safe places to hide
Should we give up and keep mouth shut and find some
safe places to hide
Should we just give up and keep mouth shut and find
some safe places to hide
Should we just give up and keep mouth shut and find
some safe places to hide

Coal-burning power plants, car exhausts, factory
smokestacks
Coal-burning power plants, car exhausts, factory
smokestacks

Oh my god!
What do you give to the world
On the other side, you give us a sign
Right now!

A slow but steady rise in the earth surface temperature
Most major governments
A slow but steady rise in the earth surface temperature
Oh!
