Humanity will march towards progress  
Feet in chains to achieve the perfect union  
Progress to destroy the story's scars  
Those who resist change fall to a realm  
A realm ignored

A radical revolution to recreate the great realm  
A Forced Change  
Murder machine in the hills to enforce order  
To change the infields

Raw and bloody is the ultimate path  
Sweep up the hurricane of progress to make the day

There is no middle ground toward a forced change  
So leave the glass building that traps your soul

A radical revolution to recreate the great realm  
A Forced Change  
Murder machine in the hills to enforce order  
To change the infidels
