There be no more positive influences  
Souls taped to menacing powers  
Rainstorms of brutality and outrage come of age  
People's mind duped and commit bad things

Fog is surpressing the correct light  
Making people believe what is wrong correct  
Lifestyles changed for the worse  
Changing is hard  
They have to endure

Lights blinded to make fools out them  
Breakneck change is needed to change them  
Before the trouble comes  
Than now

Fog is surpressing the correct light  
Making people believe what is wrong correct  
Lifestyles changed for the worse  
Changing is hard  
They have to endure

Some can't distinguish fantasy from reality  
Thus harming their souls and barricading the light  
Nothing can be done  
It will continue (and fight)
