"Crashin"

Visit "[Crashin](#)" on MotoLyrics.com

I never knew it could come to this
Wasting everyone's time to do what you want to do
You sit around just thinking about
(You)

(Chorus)
You come crashin' after me
After everything comes clear
You just mess it up again
Following my tracks just blaming everything on me
(Oh where did you go...

I guess your trying everything
Wasting my time...

(Katy Perry)-
Don't be crashing on us when you are the one burning
Turning around because all I see is you trying to be a
pain
Just because you ain't a rocket scientist
And you don't have to figure this problem out.

(Chorus)
You come crashing after me
After everything comes clear
You just mess it up again Following my tracks just
blaming everything on me
(Oh where did you go?)

When considering you it's like talking to a tree
When you are crashing
You are also burning
Calling everyone out
But you are the one burning.
What now?
