Evil has be shown in wars which have devastated  
Countries in Africa because of greed to be in  
Control and not to provide for the good of the people  
Resources exploited but not to improve the countries

Diamonds were culprits  
So many were forced  
To be on the side of unethical rebels  
To create established suffering

Justice didn't come except for the leaders who ordered  
The suffering and murdering to their subordinates  
Who left the realm of ethics to create the theme of  
Those which was hell of the strongest

Diamonds were culprits  
So many were forced  
To be on the side of unethical rebels  
To create established suffering
