

Rebels Against Oppression

"Makes The March Worth It"

The word family values has been twisted
To give bad ideologues the justification
To hate LGBT people but tolerance
Will come to sever the power of homophobia

Lies in the name of religion have been told
Politicians advance bills
Whose aim is to erode tolerance and who also
Refuse to go beyond the bad level of homophobia

A top of the years of intolerance and oppression
Is Equality for LGBT people
Which makes the march worth it
The march is worth it

There's nothing wrong with sexual orientation and
Gender identity so equality for LGBT people is a must
Change is slow but bad ideologues feel the power of
People who refuse to surrender to indignity

Same-sex marriage will be a right when
Equality for LGBT people in every country comes
So march and fight for what must be done
And leave churches that support homophobia

A top of the years of intolerance and oppression
Is Equality for LGBT people
Which makes the march worth it
The march is worth it
