The podium that I shout yell won't
Ever be used to bash LGBT rights
Or youth or human rights
Which too many can't comprehend

My Side on the culture war
Includes neutralizing social conservatism
And ripping bills apart against freedom
To progress for beautiful freedom

Religion doesn't and will never justify
The years of past in which
LGBT people didn't have their equality
That's a right which must be required

My Side on the culture war
Includes neutralizing social conservatism
And ripping apart bills against freedom
To progress for beautiful freedom
