It's usually the intolerant people who argue  
Against youth rights  
But now neuroscientists use their  
Findings to justify ageism

So what if the brain develops at 25?  
Younger people can think clearly  
So Neuroscientists  
Keep off justifying youth injustice

What good is a field science that has  
Been used in the legislature for tyranny  
My frontal cortex is already developed enough  
Neuroscientists must stop abusing the youth

So what if the brain develops at 25?  
Younger people can think clearly  
So Neuroscientists  
Keep off justifying youth injustice
