[They were oppressed in their homeland but they  
Struggled severely for liberty to make today]

There was violence like war from those who were  
Rightfully determined to achieve equality for people  
Of color in South Africa because decades before  
The struggle there was oppression without stop

If this is the committment required to achieve  
Equality for LGBT people and protect the  
Real age of majority then let it be but  
Preference goes to non-violence

The war to destroy oppression in that country  
Involved a lot of ammuniton and people  
Willing to let themselves be murdered  
But equality rightfully destroyed oppression

If this is the committment required to achieve  
Equality for LGBT people and protect the  
Real age of majority then let it be but  
Preference goes to non-violence
