It seems like it may take many lifetimes to conquer
The oppression which seems to be stuck in time
Tyranny is on a higher priority than freedom
Because of legislators that practice cowardice
And Intolerance

The fight must come because hope can seem little
But this time the fight must succeed
We must not become oppressors because
Human rights comes before it

So rise to the top of the hill and yell
Because ahead is the field to the finish
Take that powerful conviction so that the days
Without end of oppression will end

The young have been oppressed heavily
And LGBT people are waiting for equality
Against people who leave reason for tyranny
The march to to the final hill must come

So rise to the top of the hill and yell
Because ahead is the field to the finish
Take that powerful conviction so that the days
Without end of oppression will end
