1984 like the book is the year in which  
An oppressive drinking age was required to be set  
So students under 21 live with downed liberty  
Until states stop following that oppression

Police officers have been the ones behind  
Crackdowns against the use of alcohol  
By young women and young men

Universities of oppression must no longer exist  
Degradation in those places is occurring because  
Students are not being treated as adults  
Resulting in absurdity

There must come when the day when universities  
Will repeal oppression and let responsibility come  
Which has inflicted discrimination against young adults
