Gabe

"Every Single Thing"

To everybody here
Who think that they might know me
Open your eyes before
You look at what you won't see

Doing everything I can
I hope I will be strong
When every single thing
When every single thing
When every single thing is wrong

And when you thought there was no reason for my
crying
I thought about the possibility of dying
And I hope you understand
Why we don't get along
When every single thing
When every single thing
When every single thing is wrong
Yeah, it's wrong

And I think that you don't even understand me
And I'll never compromise on what I want to be

[Repeat Chorus]
