Come on, turn off the lights, there's nothing to be  
scared of  
Stop clinging to my arm, there's no one here but me  
If something could go wrong here, don't you think I'd  
let you see  
You know I am the one who thinks that darkness sets  
me free

(CHORUS)

Hold out your hand, I might not catch you  
Open your arms, I might not hold you  
Put down your guard, I might hurt you  
There's only one way you will ever know  
If I could slip away and hide among the shadows  
To hear you groping blindly, calling out my name  
Then maybe I'd step in, just play the savior  
Or I could laugh out loud and leave you in the dark

(CHORUS)

Do what you want, don't let me down...

(CHORUS)

Do what you want, don't let me down...
