We're broken, soft spoken
our lives, once thought provoking
we're chasing down old dreams, our pens/friends?,
they use blood as ink
we're blinded, reminded,
by all our fears and beliefs
to continue onward and finally see
the truth won't always set you free

we've been searching for clarity
we've been waiting so patiently
for all that we can't see
our problems sing us to sleep

out of breath, full of sweat, tonight's a night i'll regret,
the bed's a mess and god's upset we're playing games
between life and death
we've been searching for clarity
we've been waiting so patiently
for all that we can't see
our problems sing us to sleep

it's all sex and drugs and alcohol and searching for
love finding reasons to not give up, my problems have
a name, it seems they always know my face, there's no
warmth to find beneath my sheets and all that i have
seen, i only fear one thing
