You say (you say)  
There's no place you'd rather be (place you'd rather  
be)  
When you're lying next to me (lying next to me)

I say (I say)  
There's no one I'd rather see (no one I'd rather see)  
When you're lying next to me (lying next to me)

You say (you say)  
That you'd never want to go (never want to go)  
When you're lying next to me (lying next to me)

I say (I say)  
That I want to take it slow (that I want to take it slow)  
When you're lying next to me (lying next to me)

Let me take you for a swim, inside my head  
We'll go back to the time, that we first met  
And made a promise to each other, that we'd be friends  
Forever and more

You say (you say)  
You are totally complete (you are totally complete)  
When you're lying next to me (lying next to me)

I say (I say)  
Even your tears will taste sweet (your tears will taste  
sweet)  
When you're lying next to me (next to me)

You say (you say)  
A better place cannot be found (place cannot be found)  
When you're lying next to me (lying next to me)

I say (I say)  
Let's make my bed a playground (make my bed a  
playground)  
When you're lying next to me (lying next to me)

When you're lying next to me (lying next to me)

A better place cannot be found (place cannot be found)

When you're lying next to me (lying next to me)

Let me take you for a swim, inside my head  
We'll go back to the time, that we first met  
And made a promise to each other, that we'd be friends  
Forever and more

You say  
That you'd never want to go (never want to go)  
When you're lying next to me

I say  
That I want to take it slow (take it slow)  
When you're lying next to me

You say  
A better place cannot be found  
When you're lying next to me

I say  
Let's make my better playground  
When you're lying next to me

When you're lying next to me

When you're lying next to me
