You are nothing to me now. Your face has been rotted
from memory. Memory. I Just hate you, I deny you, I
despise you. I don't need you. I Just hate you, I deny, I
despise you. I don't need you. Lilies can fade,
promises unmade, we cant be saved. Drawn in regret,
facts made offset, deny the bet, deny the bet. There is
no way to believe that everything you say is what it
really is what you really say.

There is no way to believe that everything you say is
what it really is what you really say. There is no way to
believe that everything you say is what it really is what
you really say. There is no way to believe that
everything you say is what it really is what you really
say.
